Contents of Volume 111

Number 1, 7 November 1984

LUMSDEN, C. J. Dual Inheritance in Haploid Organisms: Model of Magnetotactic Bacteria 1

ZIELENKIEWICZ, P. and RABCZENKO, A., Protein–Protein Recognition: Methods for Finding Complementary Surfaces of Interacting Proteins 17

SALU, Y. Theoretical Models and Computer Simulations of Neural Learning Systems 31

KŘEMEN, A., Logical Elements in Living Cells 47

HIRSCH, H. R., Influence of the Existence of a Resting State on the Decay of Synchronization in Cell Culture 61

PŘIDAL, I. and LOKAJÍČEK, M. V., A Model of DSB-Repair Kinetics 81

HIRAM, Y. and NIR, A., On Mechanical Aspects of Vesicular Transport 91

CHEN, I. I. H., A Mathematical Representation for Vessel Network III 115

COOPER, M. S., Gap Junctions Increase the Sensitivity of Tissue Cells to Exogenous Electric Fields 123

ZACHMANN, D. W. and LOGAN, J. A., Mathematical Stability Analysis for an Age-structured Population with Finite Life Span . 131

KAWATO, M., Cable Properties of a Neuron Model with Non-Uniform Membrane Resistivity 149

WEEKLEY, L. B., A Mechanism by which Primary or Secondary Hypothalmic Involvement Results in the Development of Insulin-dependent Diabetes Mellitus (IDDM) 171

MARGALIT, M., ROSENBERGER, R. F. and GROVER, N. B., Initiation of DNA Replication in Bacteria: Analysis of an Autorepressor Control Model 183

LETTER TO THE EDITOR

LACY, M. E., Phonon-electron Coupling as a Possible Transducing Mechanism in Bioelectric Processes Involving Neuromelanin 201

Number 2, 21 November 1984

GREGORIUS, H-R., Fractional Fitnesses in Exclusively Sexually Reproducing Populations 205

MIKLAVC, A., Could Binding Sites of a Receptor be "Seen"? A Great Challenge to Picosecond Spectroscopy 231

MURRAY, M. G. and GERRARD, R., Conflict in the Neighbourhood: Models where Close Relatives are in Direct Competition . 237

FRÖMMEL, C., The Apolar Surface Area of Amino Acids and Its Empirical Correlation with Hydrophobic Free Energy . . 247

STONE, M., Informativeness in Stimulus-Response Modelling . 261

PALSSON, B. O. and LIGHTFOOT, E. N., Mathematical Modelling of Dynamics and Control in Metabolic Networks. I. On Michaelis-Menten Kinetics 273

PALSSON, B. O., JAMIER, R. and LIGHTFOOT, E. N., Mathematical Modelling of Dynamics and Control in Metabolic Networks. II. Simple Dimeric Enzymes 303

GALLEZ, D., Cell Membranes after Malignant Transformation Part I: Dynamic Stability at Low Surface Tension 323

GALLEZ, D., Cell Membranes after Malignant Transformation Part II: Dynamic Stability with Surface Chemical Reactions . 341

SAVAGE, J. R. K., PRASAD, R. and PAPWORTH, D. G., Subdivision of S-phase and its Use for Comparative Purposes in Cultured Human Cells 355

NAMBA, T., Competitive Co-existence in a Seasonally Fluctuating Environment 369

PATE, E., The Organizer Region and Pattern Regulation in Amphibian Embryos 387

MALPRESS, F. H., The Coulombic Hypothesis of Mitochondrial Energy Transduction: an Attempt to Quantify Relationships in the Energized Zones 397

WARD-SMITH, A. J., Aerodynamic and Energetic Considerations Relating to Undulating and Bounding Flight in Birds . . 407

LETTER TO THE EDITOR

MACDONALD, N., The Usefulness of Growth Models for Trees 419

Number 3, 7 December 1984

GREGORIUS, H-R., Allele Protectedness in Frequency Dependent Biallelic Selection Models with Separated Generations . . 425

VENANZI, T. J., Hydrophobicity Parameters and the Bitter Taste of L-amino Acids 447

HUNT, R. and DOYLE, C. J., Modelling the Partitioning of Research Effort in Ecology 451

SIBLY, R. and CALOW, P., Direct and Absorption Costing in the Evolution of Life Cycles 463

LEIMAR, O. and ENQUIST, M., Effects of Asymmetries in Owner-Intruder Conflicts 475

WITTEN, M. and DE LA TORRE, D. L., Biological Populations Obeying Difference Equations: The Effects of Stochastic Perturbation 493

DE COCK BUNING, T., A Theoretical Approach to the Heat Sensitive Pit Organs of Snakes 509

KLAWANSKY, S. and FOX, M. S., A Growth Rate Distribution Model for the Age Dependence of Human Cancer Incidence: A Proposed Role for Promotion in Cancer of the Lung and Breast . . 531

BLUM, J. J., Hormone Receptor-Coupling Factor-Adenylate Cyclase Interaction: Theoretical Considerations 589

WEEKLEY, L. B., Central Neuroendocrine Regulation of Renin Secretion Rate: A Hypothesis 609

Number 4, 21 December 1984

WILSON, J. E., Some Thoughts on the Evolutionary Basis for the Prominent Role of ATP and ADP in Cellular Energy Metabolism 615

HONDA, H. and OSHIBE, S., A Computer Simulation of Cell Stacking for Even Thickness in Mammalian Epidermis 625

REGEN, D. M. and PILKIS, S. J., Sensitivity of Pathway Rate to Activities of Substrate-Cycle Enzymes: Application to Gluconeogenesis and Glycolysis 635

SCOTT, J. A., Phospholipase Activity and Plasma Membrane Homeostasis 659

HINES, W. G. S. and BISHOP, D. T., Can and Will a Sexual Diploid Population Attain an Evolutionary Stable Strategy? . . 667

MCCOY, E. L. and BOERSMA, L., The Principles of Continuum Mechanics Applied to Transport Processes and Deformation in Plant Tissue 687

KURGANOV, B. I., Adsorption of Peripheral Enzymes to Membrane Anchor Proteins 707

DAVISON, J. A., Semi-Meiosis as an Evolutionary Mechanism . 725

RICARD, J. and NOAT, G., Subunit Interactions in Enzyme Transition States—Antagonism between Substrate Binding and Reaction Rate 737

BASS, L., AISBETT, J. and BRACKEN, A. J., Asymptotic Forms of Tracer Clearance Curves: Theory and Applications of Improved Extrapolations 755

HUGHES, A. J. and LAMBERT, D. M., Functionalism, Structuralism, and "Ways of Seeing" 787

RAPPAPORT, C., An Hypothesis on the Role of Cellular Colloid Osmotic Pressure in Determining Behavior of Cells *in vitro* including Anchorage Dependency and Maintenance of the Differentiated State 801

LETTER TO THE EDITOR

MAES, F. W., Problems with Linear Regression Analysis of Pharmacological and Biochemical Data 817

Index to Volume 111

Adenylate cyclase-coupling factor-hormone receptor interaction: theoretical considerations, 589

ADP and ATP, evolutionary basis for their prominent role in cellular energy metabolism, 615

Adsorption of peripheral enzymes to membrane anchor proteins, 707

Aerodynamic and energetic considerations relating to undulating and bounding flight in birds, 407

Age dependence of human cancer incidence, growth rate distribution model of; a proposed role for promotion in cancer of the lung and breast, 531

Age-structured population with finite life span, mathematical stability analysis for, 131

AISBETT, J. (see BASS, L.), 755

Allele protectedness in frequency dependent biallelic selection models with separated generations, 425

Amino acids, the apolar surface area of, and the empirical correlation with hydrophobic free energy, 247

L-amino acids, hydrophobicity parameters and the bitter taste of, 447

Amphibian embryos, the organizer region and pattern regulation in, 387

Anchor proteins, membrane, adsorption of peripheral enzymes to, 707

Anchorage dependency, and the role of cellular colloid osmotic pressure in determining behaviour of cells *in vitro*, 801

Apolar surface area of amino acids and its empirical correlation with hydrophobic free energy, 247

Asymmetries, effects in owner-intruder conflicts, 475

ATP and ADP, evolutionary basis for their prominent role in cellular energy metabolism, 615

Autorepressor control model for initiation of DNA replication in bacteria, 183

Bacteria, initiation of DNA replication in; analysis of an autorepressor control model, 183

Bacteria, magnetotactic, a model of; dual inheritance in haploid organisms, 1

BASS, L., AISBETT, J. and BRACKEN, A. J., Asymptotic forms of tracer clearance curves: theory and applications of improved extrapolations, 755

Biallelic selection models, frequency dependent, with separated generations, allele protectedness in, 425

Binding sites of a receptor, could they be "seen"? A great challenge to picosecond spectroscopy, 231

Biochemical and pharmacological data, problems with linear regression analysis (letter), 817

Bioelectric processes involving neuromelanin, phonon-electron coupling as a possible transducing mechanism in (letter), 201

Biological populations obeying difference equations: the effects of stochastic perturbation, 493

Birds, aerodynamic and energetic considerations relating to undulating and bounding flight in, 407
BISHOP, D. T. (see HINES, W. G. S.), 667
BLUM, J. J., Hormone receptor-coupling factor-adenylate cyclase interaction: theoretical considerations, 589
BOERSMA, L. (see MCCOY, E. L.), 687
BRACKEN, A. J. (see BASS, L.), 755
Breast cancer, and a growth rate distribution model for the age dependence of human cancer incidence, 531

Cable properties of a neuron model with non-uniform membrane resistivity, 149
CALOW, P. (see SIBLY, R.), 463
Cancer, human, a growth rate distribution model for the age dependence of incidence of; a proposed role for promotion in cancer of the lung and breast, 531
Cell culture, influence of the existence of a resting state on the decay of synchronization in, 61
Cell membranes after malignant transformation; dynamic stability at low surface tension, 323
Cell membranes after malignant transformation; dynamic stability with surface chemical reactions, 341
Cell stacking for even thickness in mammalian epidermis, a computer simulation, 625
Cells, human, cultured, subdivision of S-phase and its use for comparative purposes in, 355
Cells, living, logical elements in, 47
Cells, tissue, gap junctions increase the sensitivity of, to exogenous electric fields, 123
Cellular colloid osmotic pressure, role in determining behaviour of cells *in vitro*, including anchorage dependency and maintenance of the differentiated state, 801
Cellular energy metabolism, evolutionary basis for the prominent role of ATP and ADP in, 615
Central neuroendocrine regulation of renin secretion rate: a hypothesis, 609
Chemical reactions, surface, dynamic stability with; cell membranes after malignant transformation, 341
CHEN, I. I. H., A mathematical representation for vessel network III, 115
Co-existence, competitive, in a seasonally fluctuating environment, 369
Colloid osmotic pressure, cellular, role in determining behaviour of cells *in vitro*, including anchorage dependency and maintenance of the differentiated state, 801
Competition, direct, between close relatives; conflict in the neighbourhood, 237
Competitive co-existence in a seasonally fluctuating environment, 369
Computer simulation of cell stacking for even thickness in mammalian epidermis, 625
Computer simulations of neural learning systems, 31
Conflict in the neighbourhood: models where close relatives are in direct competition, 237
Conflicts, owner–intruder, effects of asymmetries, 475
Continuum mechanics, application to transport processes and deformation in plant tissues, 687
Control and dynamics in metabolic networks, mathematical modelling; Michaelis–Menten kinetics, 273
Control and dynamics in metabolic networks, mathematical modelling; simple dimeric enzymes, 303

COOPER, M. S., Gap junctions increase the sensitivity of tissue cells to exogenous electric fields, 123
Coulombic hypothesis of mitochondrial energy transduction: an attempt to quantify relationships in the energized zones, 397
Costing, direct and absorption, in the evolution of life cycles, 463
Cycles, life, direct and absorption costing in the evolution of, 463

DAVISON, J. A., Semi-meiosis as an evolutionary mechanism, 725
DE COCK BUNING, P., A theoretical approach to the heat sensitive pit organs of snakes, 509
Deformation in plant tissue, the principles of continuum mechanics applied to transport processes and, 687
DE LA TORRE, D. L. (see WITTEN, M.), 493
Diabetes mellitus, insulin-dependent, the hypothalamic involvement in development of, 171
Difference equations, biological populations obeying; the effects of stochastic perturbations, 493
Diploid sexual population, can and will it attain an evolutionary stable strategy?, 667
DNA replication initiation in bacteria: analysis of an autorepressor control model, 183
DOYLE, C. J. (see HUNT, R.), 451
DSB-repair kinetics, a model of, 81
Dual inheritance in haploid organisms: a model of magnetotactic bacteria, 1
Dynamics and control in metabolic networks, mathematical modelling; Michaelis–Menten kinetics, 273
Dynamics and control in metabolic networks, mathematical modelling; simple dimeric enzymes, 303

Ecology, modelling the partitioning of research effort in, 451
Electric fields, exogenous, gap junctions increase the sensitivity of tissue cells to, 123
Embryos, amphibian, the organizer region and pattern regulation in, 387
Energetic and aerodynamic considerations relating to undulating and bounding flight in birds, 407
Energy, cellular, metabolism, the evolutionary basis for the prominent role of ATP and ADP in, 615
Energy transduction, mitochondrial, the coulombic hypothesis; an attempt to quantify relationships in the energized zones, 397
ENQUIST, M. (see LEIMER, O.), 475
Environment, seasonally fluctuating, competitive co-existence in, 369
Enzyme transition states, subunit interactions in; antagonism between substrate binding and reaction rate, 737
Enzymes, dimeric, simple, and mathematical modelling of dynamics and control in metabolic networks, 303
Enzymes, peripheral, adsorption to membrane anchor proteins, 707
Enzymes, substrate-cycle, sensitivity of pathways rate to activities of; application to gluconeogenesis and glycolysis, 635
Epidermis, mammalian, a computer simulation of cell stacking for even thickness in, 625
Evolution of life cycles, direct and absorption costing in, 463

Evolutionary basis for the prominent role of ATP and ADP in cellular energy metabolism, 615
Evolutionary mechanism, semi-meiosis as, 725
Evolutionary stable strategy, can and will it be attained by a sexual diploid population?, 667

Fitness, fractional, in exclusively sexually reproducing populations, 205
Flight, undulating and bounding, in birds, aerodynamic and energetic considerations, 407
FOX, M. S. (see KLAWANSKY, S.), 531
Fractional fitness in exclusively sexually reproducing populations, 205
Free energy, hydrophobic, the apolar surface area of amino acids and its empirical correlation with, 247
Frequency dependent biallelic selection models with separated generations, allele protectedness in, 425
FROMMEL, C., The apolar surface area of amino acids and its empirical correlation with hydrophobic free energy, 247
Functionalism, structuralism, and "ways of seeing", 787

GALLEZ, D., Cell membranes after malignant transformation. I. Dynamic stability at low surface tension, 323
GALLEZ, D., Cell membranes after malignant transformation. II. Dynamic stability with surface chemical reactions, 341
Gap junctions increase the sensitivity of tissue cells to exogenous electric fields, 123
GERRARD, R. (see MURRAY, M. G.), 237
Gluconeogenesis and the sensitivity of pathways rate to activities of substrate-cycle enzymes, 635
Glycolysis and the sensitivity of pathways rate to activities of substrate-cycle enzymes, 635
GREGORIUS, H-R., Allele protectedness in frequency dependent biallelic selection models with separated generations, 425
GREGORIUS, H-R., Fractional fitness in exclusively sexually reproducing populations, 205
GROVER, N. B. (see MARGALIT, M.), 183
Growth models for trees, the usefulness of (letter), 419
Growth rate distribution model for the age dependence of human cancer incidence: a proposed role for promotion in cancer of the lung and breast, 531

Haploid organisms, dual inheritance in; a model of magnetotactic bacteria, 1
Heat sensitive pit organs of snakes, a theoretical approach, 509
HINES, W. G. S. and BISHOP, D. T., Can and will a sexual diploid population attain an evolutionary stable strategy?, 667
